

RIFAT ERDEM SAHIN

IBM Infrastructure Specialist

 **Location:** London, United Kingdom  **Citizenship:** British  **Email:** contact@rifaterdemsahin.com  **Phone:** +44 7848 024173  **LinkedIn:** [linkedin.com/in/rifaterdemsahin](https://www.linkedin.com/in/rifaterdemsahin)  **GitHub:** github.com/rifaterdemsahin  **Portfolio:** <https://rifaterdemsahin.com>  **Schedule a Call:** <https://calendly.com/rifaterdem/schedule>

PROFESSIONAL SUMMARY

DevOps and Hybrid Cloud Infrastructure Specialist with **12+ years of experience**, including a **2025 engagement at IBM (London)** architecting hybrid cloud transformation platforms on **IBM Cloud + Red Hat OpenShift** for Fortune 500 enterprises. That work involved building and lifecycle-managing **operator-based, Kubernetes-native infrastructure** — the same deployment model IBM Maximo Application Suite (MAS) relies on — across hybrid and multi-cloud environments, and delivering **zero-downtime OpenShift/Kubernetes migrations for mission-critical financial and government workloads**. Deep hands-on background in Ansible Automation Platform, Terraform IaC, and DevSecOps practices applied directly to regulated, high-availability estates. Bringing this operator-driven OpenShift platform expertise to MAS infrastructure delivery: installation, upgrade, and day-2 operations of enterprise workloads running as OpenShift Operators across on-premise, bare metal, hybrid, and public cloud (Azure, AWS, IBM Cloud).

CORE COMPETENCIES

 **Red Hat OpenShift & Operator-Based Platforms** - Design, deployment, and administration of Red Hat OpenShift clusters (multi-node and Single Node OpenShift) for enterprise, operator-managed workloads - Deep familiarity with the Operator Lifecycle Manager (OLM) pattern that underpins IBM Cloud Paks and IBM Maximo Application Suite — applied to hybrid cloud transformation projects at IBM - Cluster health, capacity, and performance troubleshooting; ingress, routing, and service mesh configuration - Persistent storage design (block/file/object) for stateful, container-native applications

 **Hybrid Cloud & Infrastructure Engineering** - Architected hybrid cloud transformation platforms on **IBM Cloud + Red Hat OpenShift** for Fortune 500 clients (IBM, 2025) - On-premise, bare metal, and cloud (Azure, AWS, IBM Cloud) infrastructure provisioning and target-architecture design for HA, scalability, and disaster recovery - VMware vSphere administration and enterprise networking, storage, and load-balancing concepts

 **Security, Compliance & Identity** - Active **UK SC** and **NATO** security clearances — direct experience delivering infrastructure into regulated financial and government environments - TLS/certificate management, identity integration (LDAP/SSO), and secrets management as part of

DevSecOps transformation work - Compliance-aligned deployment practices (GDPR, SOC2, ISO 27001)

⚙️ **Automation & Lifecycle Management** - Infrastructure as Code with **Terraform** and configuration/lifecycle automation with **Ansible Automation Platform**, used to standardize OpenShift and Kubernetes rollouts across multi-cloud estates - CI/CD pipeline design (Git-based tooling, GitHub Actions, Jenkins, GitLab CI, Azure DevOps) - Kafka-based streaming integration and monitoring/observability tooling (Prometheus, Grafana, ELK)

🔧 **Operations & Support** - 2nd/3rd-line infrastructure support, runbook authorship, and environment documentation for mission-critical production platforms - Zero-downtime Kubernetes/OpenShift migration delivery for financial and government workloads

KEY ACCOMPLISHMENTS

🏆 2025 | IBM | London, UK

Enterprise Hybrid Cloud & Operator-Based Infrastructure Transformation - Architected a hybrid cloud transformation platform on **IBM Cloud + Red Hat OpenShift** for Fortune 500 enterprises, standing up the same operator-managed, Kubernetes-native infrastructure pattern that IBM Maximo Application Suite (MAS) deploys on - Implemented watsonx AI-driven automation, reducing operational overhead by **35%** - Led DevSecOps transformation integrating **Ansible Automation Platform** and **Terraform IaC** across multi-cloud environments — the same tooling used for MAS install/upgrade/patching automation - Delivered **zero-downtime Kubernetes/OpenShift migrations** for mission-critical financial and government workloads, directly comparable to the high-availability, regulated-sector demands of MAS platform operations - **Technologies:** IBM Cloud, Red Hat OpenShift, watsonx AI, Ansible Automation Platform, Terraform, Kubernetes, GitHub Actions

🏆 2024 | Goldman Sachs | Muscat, Oman

AI-Driven CI/CD & Infrastructure Automation Framework - Built an AI-driven CI/CD framework increasing deployment frequency by **300%** - Reduced infrastructure operational costs by **30%** through intelligent automation, in a highly regulated financial-services environment - **Technologies:** Python, Jenkins, GitLab, Kubernetes

🏆 2023 | Ypsomed | Switzerland

IoT Platform Migration & Workflow Optimization - Migrated IoT integration systems and optimized CI/CD workflows in a regulated healthcare/manufacturing environment - Achieved a **40% reduction** in versioning conflicts across environments - **Technologies:** Git, CI/CD, Azure, IoT Hub

🏆 2021 | Emerson | USA

Kubernetes Platform Optimization for Industrial Workloads - Improved computational efficiency by **45%** using Kubernetes and GPU-based containers for manufacturing/industrial workloads - **Technologies:** Kubernetes, Docker, NVIDIA GPU

TECHNICAL SKILLS

Container & Operator Platforms: Red Hat OpenShift, Single Node OpenShift (SNO), Kubernetes, Operator Lifecycle Manager (OLM), Docker, Helm **IBM & Hybrid Cloud:** IBM Cloud, IBM watsonx AI, hybrid cloud architecture, operator-based enterprise application patterns (directly transferable to IBM Maximo Application Suite) **Cloud Platforms:** Microsoft Azure (AKS, Azure DevOps), AWS (EKS, CloudFormation), IBM Cloud **On-Premise & Virtualization:** VMware vSphere, bare metal provisioning, storage & networking (block/file/object, load balancers, DNS, ingress) **Automation & IaC:** Terraform, Ansible / Ansible Automation Platform, GitOps **CI/CD & DevSecOps:** GitHub Actions, Jenkins, GitLab CI, Azure DevOps, secrets management, TLS/certificate management, LDAP/SSO **Monitoring & Data:** Prometheus, Grafana, ELK Stack, Kafka, Apache Airflow **Operating Systems:** Red Hat Enterprise Linux (RHEL), Linux administration **Languages:** Python, Bash, YAML, Go

CERTIFICATIONS & EDUCATION

- 📜 **Claude Architect Professional Certification** — Anthropic
- 🛡️ Active **UK SC (Security Check)** clearance — valid until 2028
- 🛡️ Active **NATO** clearance — valid until 2029
- Microsoft Certified Architect in Cloud Solutions (70-532); additional Azure, AWS, and Kubernetes certifications
- 🎓 BSc, Southern New Hampshire University, USA (2013)

Note: IBM Maximo Application Suite product certification and Red Hat OpenShift certification (DO280/DO380) are not yet held — happy to pursue these on onboarding given the directly applicable OpenShift operator and hybrid cloud background above.
