Profile

Experienced **Senior Platform & AI Engineer** with a strong foundation in **Linux automation**, **Python scripting**, and **cloud infrastructure management**. Skilled in building **automated TechOps systems**, optimizing **CI/CD pipelines**, and enhancing **Azure-based environments** for scalability, observability, and resilience.

Known for hands-on delivery, process optimisation, and improving engineering velocity through **tool building, automation, and clear diagnostics documentation**.

Core Skills & Expertise

Area	Details
Operating Systems	Linux (Ubuntu), Windows Server
Languages	Python, Bash, PowerShell, YAML
Cloud & Infrastructure	Microsoft Azure (Monitoring, Alerts, Migrations, ARM Templates, ACR, AKS)
Automation & DevOps	Terraform, Ansible, Jenkins, GitHub Actions, Azure DevOps
Databases	MariaDB, Azure MySQL, PostgreSQL
Tooling & Monitoring	ELK Stack, Prometheus, Grafana, Datadog
Ticketing & TechOps	ServiceNow, Jira Automation, custom n8n pipelines

Process & Release Management

CI/CD orchestration, release coordination across departments

Documentation

Technical runbooks, diagnostic architectures, automation playbooks

 Relevant Experience

AI Infrastructure Engineer — IBM (UK)

2024 – Present

- Delivered **AI-driven automation** for Critical National Infrastructure, reducing manual operations by **30%**.
- Integrated **Azure Monitor** and **Logic Apps** for real-time alerts and auto-responses.
- Coordinated **release cadences** across multiple engineering teams, improving reliability and velocity by **20%**.

DevOps Consultant — Goldman Sachs (Muscat, Oman)

2023

- Built a **CI/CD framework** in Python for internal AI-driven deployments, increasing throughput 4×.
- Automated ticket resolution workflows using **n8n + Azure Functions**, cutting response time by **35%**.
- Designed system-level documentation for cross-departmental diagnostics.

Platform Migration Engineer — Ypsomed (Switzerland)

2022

- Led **Azure infrastructure migration** with improved monitoring and alert automation.
- Consolidated Git/TFS repositories and reduced codebase errors by **40%**.

Automation Engineer — Cushman & Wakefield (London, UK)

2021

- Integrated **Databricks** and **MuleSoft** into automated data pipelines.
 - Enhanced monitoring and alerting systems, cutting operational issues by **35%**.
-

Achievements

- 🏆 **MVP Award in Object-Oriented Databases (Db4o)**
 - 🚀 200+ GitHub Repositories delivered as part of internal “Delivery Pilot Program.”
 - 🎓 Certified Trainer for **Pluralsight**, **Knowledge Academy**, and **Coursera**.
-

Security & Clearance

- **UK Security Clearance (SC)** valid until **2028**
 - **BPSS**, **DBS**, and **CNI** verified
 - Cleared by **IBM Watchdog (2024)** and **Sterling (2020)**
-

Education & Certifications

- **B.Sc.**, *Southern New Hampshire University, USA*
 - **Microsoft Certified Architect – Cloud Solutions (70-532)*
-

Availability

✓ Open to **permanent or contract-to-permanent** roles
